Problem 3, Part A - Compare TFs (poles and zeros) 1
Problem 3, Part B - Compare step responses 2

```
Exiting: Maximum number of function evaluations has been exceeded
         - increase MaxFunEvals option.
         Current function value: 0.000000
```

Get high fidelity TFs

Problem 3, Part A - Compare TFs (poles and zeros)

```
da_over_p_tf =

  63.743 (s+5.014)^2 (s-0.05737) (s+0.01746)^2 (s^2 + 5.592s +
 64.79)^2

                                                        (s^2 + 6.221s +
 68.25)

 ------------------------------------------------------------------------

             (s+5.014)^3 (s+0.01746)^3 (s^2 + 5.592s + 64.79)^3

Continuous-time zero/pole/gain model.

G_da2p =

   27.709
  ---------
  (s+4.891)

Continuous-time zero/pole/gain model.
```

Problem 3, Part B - Compare step responses
